DARING PAIR LEAVE LISBON ON WEST HOP

Start on Southern Course To
America Without Fanfare
Of Publicity.

LISBON, Aug. 19.—A new attempt to span the Atlantic by air from east to west started here today when two Swiss airmen took off from Alverca aerodrome for New York.

The fliers are Oscar Kaeser, young Swiss ace, and Kurt Luscher, a youthful compatriot, who is acting as navigator as well as sponsoring the flight financially.

The plane, christened "Jung Schweizerland" (young Switzerland) made a beautiful take-off at 7:20 a. m. New York daylight saving time. The two fliers, with the help of employees of the aerodrome, had been working almost without rest for the last few days getting the runway in condition for the start.

PLAN SOUTHERLY COURSE

Kaeser and his companion intend to take the southerly course across the ocean by way of the Azores, but no stop will be made unless severe headwinds warrant a heavy diminution of their fuel supply.

After passing the Azores, the fliers' immediate destination is Halifax, Nova Scotia, but if they still have sufficient fuel when they reach the North American coast, they will continue on to New York.

Few trans-Atlantic flight attempts have started with less advance publicity than this daring attempt. Kaeser and Luscher arrived here unannounced from Le Bourget air field, Paris, ten days ago, and immediately started to work conditioning their plane for the flight and preparing a suitable runway for the take-off.

FLIERS CONFIDENT

Alverca aerodrome was found to be admirably suited for the attempt, and the fliers enlisted the aid of airport officials to help them prepare for the start. Questioned by newspaper interviewers as to their plans, Kaeser and Luscher replied with utmost placidity that they planned to take off at the very first opportunity, and expressed utmost confidence that they would reach their goal without difficulty.

The "Jung Schweizerland" is a Farman plane, equipped with one motor of 230 horsepower.

SHIPMENTS OF CO-OP LARGER

Forty-six Floors of Livestock
Sent From Here During
July.

H. J. Briggs, service manager of the Pickaway Livestock Co-operative Association, in reporting co-operative shipments for July to the board of directors of the association Saturday night, Aug. 17, gave the following figures: A total of 46 floors comprised 2,007 hogs, 224 fat cattle, 102 calves, and 167 sheep, with a total value of \$62,538.89, were handled. Approximately 60 per cent of the livestock handled during July was sold direct to the packer. Records of the association disclosed the fact that this past month carries quite an increase in business over July, 1928, in which 37 floors of livestock representing a market value of \$69,927.87 was transacted. Orders for feeder cattle are coming in to the association from feeders who are planning to replenish their feed lots this fall. Good quality calves and yearlings are the most popular, while feeder cattle are running high in price. This type of feeders are making most economic gain and will furnish proper weight for the killers.

TAX MEETING HERE TUESDAY

Local Committee To Be Formed
To Campaign For Limit
Amendment.

A committee to direct the campaign in Pickaway-co for the proposed "Tax Limit Amendment" to the state constitution, to be voted upon at the November election, will be formed at a meeting at the Pickaway-co farm bureau office at 8 p. m. Tuesday.

The meeting will be addressed by L. B. Palmer, president of the Ohio Farm Bureau, who will represent the All Ohio Tax League. Twelve members of the committee, representing various organizations, have already been named. Other organizations are soon to name their representatives on this committee.

Members of the committee and the organizations which they represent are: Frank C. Hudson, Ashville, Ohio State Grange; C. F. Abernethy, Circleville, the Ohio Building and Loan Association; W. C. Morris, Circleville, Ohio Association of Real Estate Boards; Clark L. Will, Circleville, Ohio Bankers' Association; representative of Esmeralda Canning Co., Circleville, for Ohio Manufacturers' Association; George Fitzpatrick, Circleville, Chamber of Commerce; W. E. Crist, Circleville, Ohio State Council of Retail Merchants; Mrs. Perry S. Templeton, Proctorville, Ohio Farm Women's Clubs; Dr. Lloyd Jones, Circleville, Ohio State Medical Association; J. R. Wilson, Circleville, Ohio Hardware Association; representative W. J. Weaver & Sons, Circleville, for Ohio Wholesale Grocers' Association; Karl Herrmann, Circleville, Ohio Newspaper Association.

Lyman Bell has obtained a three weeks' contract with the Beulah Park Racing Association to cover Central Ohio with his calliope to advertise the races which open there Aug. 31.

FUEL LOADED AT CLEVELAND BY 'SUN GOD'

Endurance Fliers Late At Salt
Lake City Because of
"Dirty" Weather.

MUNICIPAL AIRPORT, Cleveland, Aug. 19.—Zooming over the airport its pilots waving a last farewell, the transcontinental round-trip endurance plane, "Sun God," swept off to the west at 8:06 a. m. today to resume the second lap of its two-way journey.

"Wire St. Paul municipal airport we have left. Thanks and regards," was the last message dropped by the "Sun God" pilots, Nick Mamer and Art Walker, before they flew over the horizon and out of sight.

In two successful contacts with the refueling plane, the "Sun God" swallowed 250 gallons of gas and its pilots consumed a hearty breakfast. The last contact between the two planes was made shortly before eight o'clock.

DELAYED BY WEATHER

The "Sun God," which had been expected to arrive here late last night, was held up by "dirty weather" just outside of New York, its pilots messaged to airport officials. They assured, however, that they were now feeling fine and that their plane was running smoothly.

The endurance's arrival brought relief to airport crews who had scanned the skies throughout the night for the long overdue craft.

An all night vigil had been kept for the endurance when the tiny refueling craft poised on the airport runway ready to hop off at a moment's notice to give food and gas supplies.

WORD WAS AWAITED

Despite word from the "Sun God" had been lacking at the airport here since the endurance left New York yesterday at mid-afternoon after completing the toilsome first half of her round-trip flight.

The "Sun God" was reported, seen over Sunbury, Pa., early this morning according to airport officials. Upon this report it had been expected that the endurance would put in its appearance here about 3 a. m.

The endurance arrived here yesterday morning at 9:03 a. m. on the first lap of its journey. It was exactly 24 hours overdue from its scheduled arrival. The plane had left Spokane, Wash., at 9:45 p. m., Thursday and was expected here early Saturday morning. Adverse weather, however, held up its flight progress.

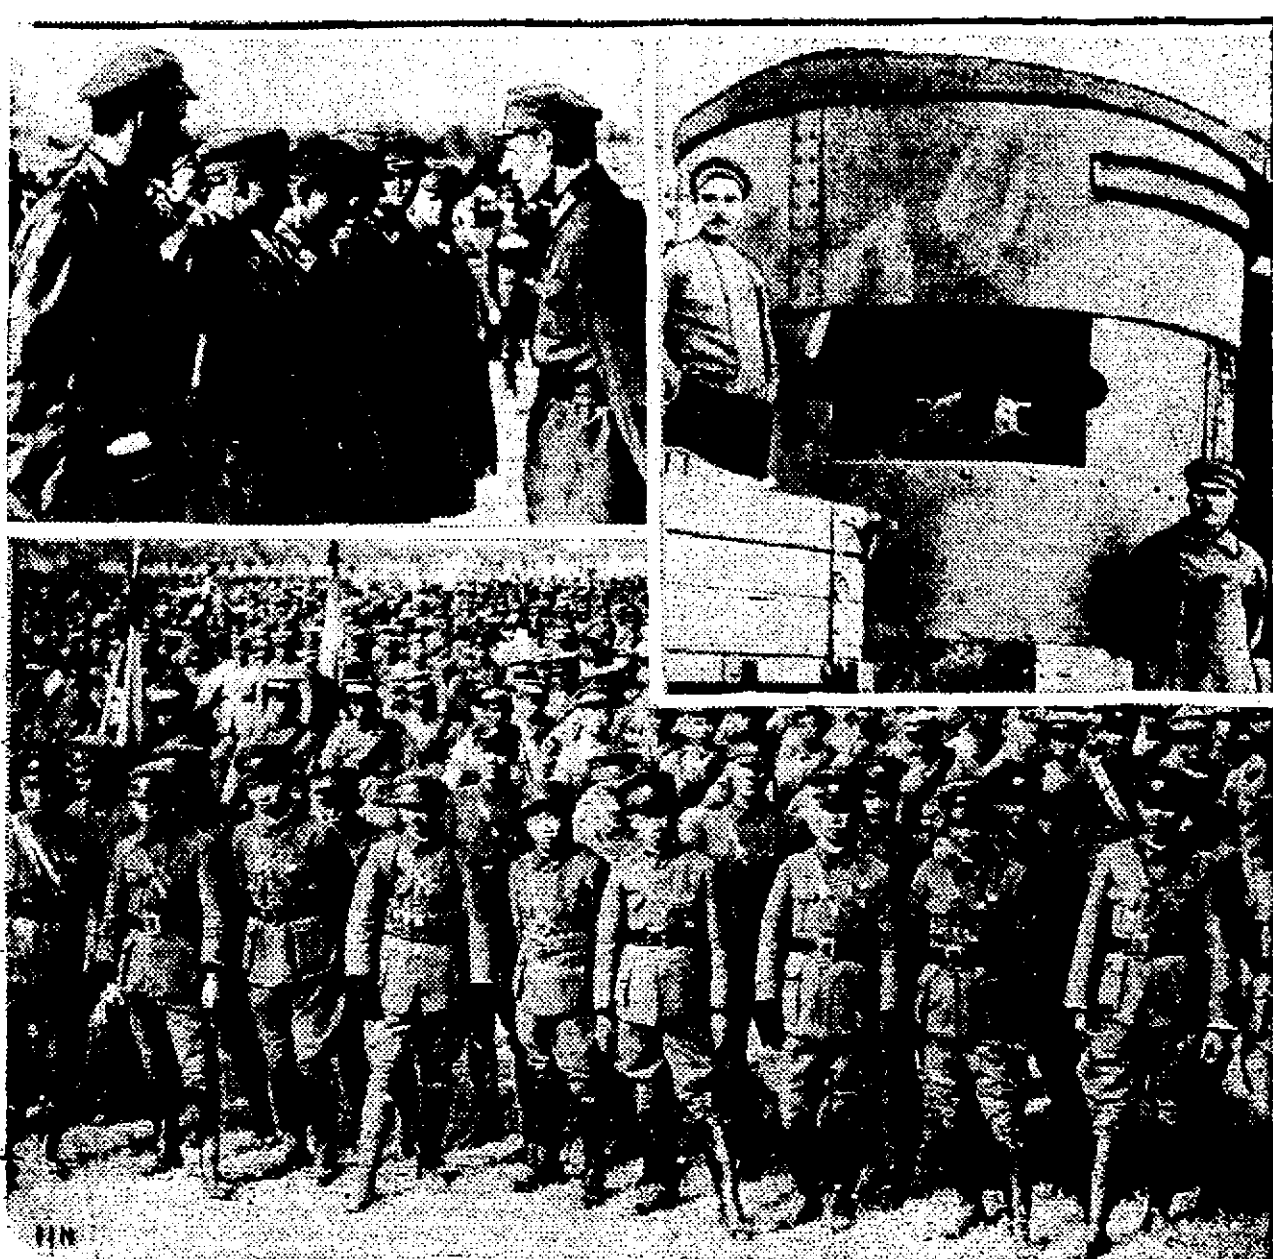

The Jackson-twp community was gripped and shocked Saturday night to hear of the girl's death. She attended the Jackson-twp school and was a member of the graduating class of 1930, and few of her associates knew that she was seriously ill. A brother, Lester List, died more than a year ago of a similar disease. A twin sister died when they were born, July 21, 1910.

Besides her parents, Maxine is survived by two brothers, Kenneth List and Ellis List of Circleville, and one sister, Mrs. Verna Dumm of Columbus. The family is surrounded by a number of relatives in their sorrow, and the daughter had a host of friends among the pupils in the Jackson-twp school, as well as among the older residents of that neighborhood.

Funeral services will be conducted Thursday afternoon at 2:30 o'clock at the Trinity Lutheran church, on E. Mount-st. Maxine was a member of the Lick Run Lutheran church. Dr. G. J. Troutman and Rev. George L. Troutman will officiate at the funeral. Burial in Forest cemetery will be in charge of C. E. Hill of Williamsport.

Mr. and Mrs. Walter Kysen of Columbus were visitors at the home of her parents, Mr. and Mrs. John L. Howard, Sunday.

Manchurian War Clouds Threaten Peace

Latest advices from the Far East indicate the complete breakdown of a diplomatic settlement of the Chinese-Russian controversy and the seriousness of the situation is unquestioned. Russian aviators of the type seen in the upper left hand corner are already active along the Manchurian border, while armored trains such as shown above, will transport troops to the front. The Chinese army has also been active and is well trained. Pictured below are a number of staff officers of the Nationalist forces who may see additional fighting after long years of civil warfare.

Girl Fatally Injured As Auto Overturns

Victim Pinned Under Auto,
Forced From Road Near
Austin, Ross-Co.

Miss Ann Garrett, 18, Dayton, was fatally injured Sunday at 10 p. m. when the auto in which she was riding in company with a friend, Mr. Buckley, also of Dayton, overturned near Austin, Ross-co.

The machine, a Pontiac roadster was forced off the road by another car which did not stop and overturned, pinning Miss Garrett under it crushing her about the chest. She was removed to the office of Dr. Tinker in Frankfort where she was given medical aid, and later removed in the Metzger

and Fisher ambulance to the Chillicothe hospital where she died a few minutes after arrival there.

Miss Garrett and friend were returning to Dayton after having spent the day with relatives of the former in Jackson when the fatal accident occurred. She was employed as a clerk in a restaurant at Dayton. Her parents are dead.

The body was removed to the Metzger and Fisher funeral parlors where it was prepared for burial and later taken to Jackson, her former home, where the funeral will be held on Wednesday.

15 ARE KILLED

Fifteen dead and more than four score injured was the toll taken by traffic accidents in Ohio during the week-end according to a statewide checkup which was completed by International News Service at noon today.

Of those injured, 71 were hurt in a train wreck near Condit in Delaware-co, when a Columbus-bound Cleveland excursion train was derailed by "split" rails. The fact that the 19 coaches of the train were made of steel is believed to have prevented a large death toll. Deaths were due largely to automobile crashes. One man was run down and killed by a train at Cincinnati.

One of the worst crashes of the week-end occurred near Dayton, when the life of a young girl was snuffed out by flames which enveloped the car in which she was riding after it careened from a curve into a ditch. The dead girl is Dorothy Banga, 21, of Dayton. Two other persons in the "death car" escaped with only slight hurts.

SOLDIERS JAILED

Clifford Haddock and William Miller were arrested Sunday by Deputy Sheriff Miller Fissell, on a charge of A. W. O. L. from Camp Perry. The warrants were issued by the Ohio National Guard.

WAR OUTLOOK MORE SERIOUS

Heavy Mobilization of Troops
To Repel Soviet Reported
In China.

LONDON, Aug. 19.—The Chinese-Russian crisis entered an even more serious stage today, as reports from the far east arrived here to tell of heavy mobilization of Chinese troops and of sporadic clashes between Soviet troops and Chinese forces near the Manchurian frontier.

According to an apparently authentic dispatch to the daily telegraph from its correspondent at Peiping, General Chang-Hsueh-Liang, war lord of Manchuria, has ordered four additional brigades of Chinese troops to the Sino-Russian frontier, bringing the total of Chinese troops centered there to 100,000.

Other dispatches told of additional mobilization, indicating that a force of no less than 150,000 men will shortly be massed on the Manchurian side of the frontier.

This heavy concentration of troops, the first genuine warlike moves on the part of China since the crisis first developed, is reported to be due to alleged Soviet invasion of Chinese territory at several points along the border. Several "clashes" have occurred. The most serious being reported from Balaun, the coal mine station of the Chinese Eastern railway, where more than 50 casualties are rumored.

FORMER RESIDENT OF CITY IS DEAD

Frederick Humble, 75, Lima, formerly of Circleville, died in a hospital there Sunday morning and the body has been brought to Columbus for burial. Mr. Humble is survived by two brothers, Frank and S. B. Humble, both of Columbus, and a sister, Mrs. Susan Harps, also of Columbus.

Funeral services will be held at 2:30 p. m. Tuesday at the J. I. Hughes chapel and burial will be at Greenlawn cemetery.

GREAT THROG GREET'S CRAFT UPON ARRIVAL

Speedy Journey Made Across
Trackless Siberian Wastes
By Zeppelin.

KASUMIGAURA AIR FIELD, TOKIO, Aug. 19.—(H.N.)—Completing the second leg of her round the world journey in a blaze of glory, the giant dirigible Graf Zeppelin landed here at 6:40 p. m. today (5:40 a. m. New York Daylight Saving time), following her epochal flight across half of Europe, Russia and Siberia from Friedrichshafen, Germany.

The giant air liner, which is attempting the pioneer circumnavigation of the globe, had been in the air 102 hours and five minutes since she took off from Friedrichshafen last Thursday on the most hazardous leg of her journey.

FLIES OVER TOKIO

A ground crew of 300 sailors, sailors and marines, received from the various army and navy bases around Tokio, had been waiting at the field for hours for the Graf's arrival. At 3:35 p. m. (2:35 a. m. New York time), the great ship first came over the aerodrome. After circling twice while a crowd of more than 100,000 persons of all nationalities roared a frenzied greeting, the Graf headed for Tokio and Yokohama, to pay courtesy visits before coming to earth at Kasumigaaura.

When the Graf returned to the airport, the crowd had grown to mammoth proportions, and the passengers and crew of 41 in the dirigible again had the thrill of floating above a cheering, gesticulating sea of humanity.

As the Zeppelin's motors, for the first time in 85 hours, ceased their dull roar and whined down to a stop, the "spider" coils of landing ropes were thrown down from hatchways, and seized by the eager hands of the ground crew.

ARRIVES AHEAD OF TIME
The landing was accomplished without great difficulty, and the Graf housed in the Kasumigaaura. (Continued on page three)

SNOOK MOTION IS CONTINUED

Fight For New Trial Started
At Columbus By Defense
Lawyers.

COLUMBUS, O., Aug. 19.—The hearing on a motion for a new trial for Dr. James Howard Snook, middle-aged convicted murderer of his young and beautiful sweetheart, Miss Theora Elz, was today continued until tomorrow morning.

Attorneys for Snook, a former Ohio State university professor, filed an affidavit declaring they had not been allowed sufficient time to prepare their case before the trial, which ended last Wednesday when the jury of 11 men and one woman deliberated less than half an hour, took only one ballot and unanimously decided Snook should die in the electric chair.

Defense counsel argued that the demonstration in the court room at the conclusion of Prosecutor John J. Chester's closing address to the jury had been "staged." The spectators in the crowded courtroom cheered when Chester pleaded that the erstwhile highly-respected college professor should die.

The prosecutor today stated that he could furnish affidavits that the demonstration had not been instigated by the state, and he was allowed until tomorrow morning to secure such affidavits.

Mr. and Mrs. M. B. Trout attended the Trout reunion in Marion, Ohio, Sunday.

DEATH CAUSED BY INFLUENZA

Gladys Maxine List Succumbs
Saturday At Jackson-Twp Home.

Influenza followed by complications caused the death Saturday at 9 p. m. of Gladys Maxine List, 19-year-old daughter of Adam and Myrtle Stonerock List at the home in Jackson-twp. During a ten days' illness with influenza, a tonsillar abscess developed. Dr. G. D. Sheets of Williamsport called Dr. Harry Brown of Chillicothe and Dr. C. G. Stewart of Circleville in consultation.

The Jackson-twp community was grieved and shocked Saturday night to hear of the girl's death. She attended the Jackson-twp school and was a member of the graduating class of 1930, and few of her associates knew that she was seriously ill. COLUMBUS, O., Aug. 19.—The hearing on a motion for a new trial for Dr. James Howard Snook, middle-aged convicted murderer of his young and beautiful sweetheart paramour, Miss Theora Hix, was today continued until tomorrow morning.

hangar, especially equipped to shelter the great air liner during her brief stay in Tokio.

By its early arrival here, the Zeppelin completed the second stage of her journey in almost 20 hours less than her commander, Dr. Hugo Eckener had hoped for. Before leaving Friedrichshafen, Dr. Eckener said he hoped to make the trip in 120 hours, but was fully prepared to have to spend 180 hours in the air if head-

winds hampered the dirigible's progress.

In every way, the Graf Zeppelin's safe and speedy completion

of the second leg of her round the world journey constitutes one of the most magnificent feats in the annals of commercial navigation by air. Four days were occupied for a trip that ordinarily takes almost a fortnight and while miles of "uncharted" air expanses were traversed by the air monarch, not the slightest mishap occurred to mar the journey.

PROVES PRACTICABILITY

Officials of the Zeppelin company and aeronautical experts here were unanimous in declaring that the flight across Asia proves beyond the shadow of a doubt the practicability of rigid, lighter-than-air machines for long distance passenger transportation.

Facing terrific hazards over the little-known Siberian waste lands, magnified by the lack of detailed weather and meteorological reports over territories where the foot of man has never trod, the Graf Zeppelin literally blazed a trail through the wilderness, and came through her ordeal like a thoroughbred.

Never once did the mammoth engines falter, nor did the ship fall prey to the vagaries of twisting currents and obstreperous winds. From the moment she pointed her nose toward the sky from the hangar at Friedrichshafen until she appeared over Tokio, the Zeppelin followed her course with the unflinching regularity of a mammoth ocean liner in a shipping lane. At times the Graf reached a speed far in excess of 100 miles an hour, and never did the pace fall far below a mile a minute.

Dr. Eckener hopes to be on his way on the long flight across the Pacific to Los Angeles by Thursday. In order to achieve this desire, he and his passengers will have to race through the round of receptions and entertainments arranged for them in Tokio with a speed comparable to that of his great airship in sight.

WORLD'S CHAMPION TEAM COMING TO STATE FAIR

COLUMBUS, OHIO, (Special).—

The great \$100,000 show team of Wilson & Co., packers, six Clydesdale geldings—which has won every event in which it has been exhibited in the horse show ring, will be on exhibition at the Ohio State Fair, Aug. 26-31.

For the past five years this splendid team of Clydesdales, the cream of all Clydes from all over the country as well as Scotland where they are a favorite animal, has won the much sought and warmly contested honor of world's champion team.

Each of these times the team has been matched with the best other six horse teams procurable,

but the Wilson outfit has had virtually no difficulty in overcoming any and all competition.

The horses will arrive in Columbus in the special express car in which they always travel. They are attended by several experienced grooms and a special veterinary surgeon who accompanies them on all trips. They travel in first-class style to avoid keeping them in cramped quarters because of their great size.

These perfect horses, while ponderous in weight, are as gentle as kittens and as sensitive as children.

No special feeds are given the animals and they are only given such care as all others are entitled

to. Their meals are given at stated hours, and when they are kept confined indoors because of weather in winter, their diet is regulated accordingly. In extremely warm weather, they are watched carefully and safe-guarded from the effects of heat.

A view of these splendid animals will show what good breeding plus careful handling can accomplish for horses.

Moore & Ross, ice cream and dairy products concern of Columbus, and the Columbus Street Cleaning Department will also have their six-hitch premium winning teams on exhibition at the fair.

OTHER ATTRACTIONS

Visitors in Columbus for the State Fair may find a number of other notable attractions.

The Airport—the country's finest. See the ships come in. Radio Show—at Memorial Hall—same week.

A. I. U. Tower. Special courtesies.

Parks, Theatres, Public Buildings.

Plan to spend a part of the week of August 26-31 at the State Fair. Too much for one day—plan for three or four.

Reduce State Fair Hazards

Columbus, O.—Fire hazards at the Ohio State Fair, Columbus, which have been the cause of much worry to exhibitors in years past, are to be very largely eliminated this year as the result of the building of a number of water mains, under the direction of Perry L. Green, Ohio director of agriculture, who is in charge of the fair. These new mains will provide a more evenly distributed water pressure. The new system will be complete in every respect. Trenches are being dug by prison labor. The Columbus fire department is much pleased with the steps taken by Director Green to increase the water supply.

NEWSPAPER SHOW

Your home newspaper will be on exhibit in the Newspaper Show at the State Fair—in the Ohio building. Drop in and register—you may help us win a prize.

Governor's Day

Thursday of State Fair week is to be Governor's Day. Thousands of political organization workers of both parties from all over the state, are expected to gather at the fair at that time in get-together events, and party councils.

Hawaii Possible State

There is no constitutional law which would prohibit the island of Hawaii being given the status of a state. It is already annexed and is a territory of the United States, having the usual territorial degree of self-government, with representation by a delegate in the United States congress.

ENTERTAINERS IN PORTSMOUTH

Baskets of bright colored garden flowers provided a charming background for the delightful bridge party at which Mrs. Stuart Walling presided Wednesday evening in her home, 912 Second-st. The affair was in the nature of a bon voyage party for Miss Nancy Grimes who is leaving next month on a several months trip to Europe, and a post-nuptial courtesy to Mrs. Laurence Kimble (Helen Hopkins) whose marriage was recently announced. The evening of bridge was concluded by presenting attractive trophies for scoring to Miss Elizabeth Altman and Miss Imogene Stalder. The honor or guests were also given pretty gifts.

Mrs. Walling was assisted by her mother, Mrs. Hayden Buch, in dispensing hospitality and a beautifully appointed salad course was served at the card tables.

Mr. and Mrs. C. A. Weldon and daughter, Miss Margaret Weldon and Miss Evangela Smith are enjoying a motor trip to Charles, W. Va., White Sulphur Springs and expect to go on to Washington, D. C.

"IT'S A GRAND AND GLORIOUS FEELING," SAYS NOAH BOWSHER

Health, After Twenty Years of Suffering, Brings Happiness To Circleville Man.

"Any medicine that can do what Spinao did for me is worthy of the praises of thousands. For twenty years one medicine after another failed to bring me relief from suffering caused by dyspepsia, indigestion and constipation. Terrible gas pains, sick headache, a tired and worn out feeling came from these ailments and made life miserable. Most of the time I was drowsy, listless and my vitality and ambition disappeared. Acute attacks of indigestion caused me no end of pain and worry.

NOAH BOWSHER

"It was hard to believe when I saw that one bottle of Spinao was bringing about an improvement after twenty years of trying one medicine after another had almost driven all hope from me. But it was true and I am now happy in the knowledge that Spinao has completely freed me from my former ailments. My digestive troubles are no more and all misery arising from them has vanished. My old time vitality and ambition have come back to me and I feel like a new man. It sure is a grand and glorious feeling and I have Spinao to thank for this wonderful change in me."

Mr. Bowshe, who resides at the Mann Hotel in Circleville, is only one of the thousands of residents of this vicinity who have found that the very make up and composition of Spinao is insurance against suffering. They discovered by personal experience that Spinao, a combination of carefully selected roots, herbs and barks and concentrated Spinao quickly went to the root of their ailments and quickly and efficiently eliminated the causes of misery and brought to them health and happiness they had not known for years.

Spinao is sold and guaranteed in Circleville by The Mykrantz Pharmacy, 147 N. Court St. and by all other good druggists in this section.—Adv.

winds hampered the dirigible's progress.

In every way, the Graf Zeppelin's safe and speedy completion of the second leg of her round the world journey constitutes one of the most magnificent feats in the annals of commercial navigation by air. Four days were occupied for a trip that ordinarily takes almost a fortnight and while miles of "uncharted" air expanses were traversed by the air monarch, not the slightest mishap occurred to mar the journey.

PROVES PRACTICABILITY

Officials of the Zeppelin company and aeronautical experts here were unanimous in declaring that the flight across Asia proves beyond the shadow of a doubt the practicability of rigid, lighter-than-air machines for long distance passenger transportation.

Facing terrific hazards over the little-known Siberian waste lands, magnified by the lack of detailed weather and meteorological reports over territories where the foot of man has never trod, the Graf Zeppelin literally blazed a trail through the wilderness, and came through her ordeal like a thoroughbred.

Never once did the mammoth engines falter, nor did the ship fall prey to the vagaries of twisting currents and obstreperous winds. From the moment she pointed her nose toward the sky from the hangar at Friedrichshafen until she appeared over Tokio, the Zeppelin followed her course with the unflinching regularity of a mammoth ocean liner in a shipping lane. At times the Graf reached a speed far in excess of 100 miles an hour, and never did the pace fall far below a mile a minute.

Dr. Eckener hopes to be on his way on the long flight across the Pacific to Los Angeles by Thursday. In order to achieve this desire, he and his passengers will have to race through the round of receptions and entertainments arranged for them in Tokio with a speed comparable to that of his great airship in sight.

EAGLES' NINE GIVEN DEFEAT BY PATASKALA

Locals Fail To Hit In Pinches and Play Poorly Sunday At Ashville.

The Circleville Eagles continued their losing streak Sunday in the game at Ashville when they were dropped on the short end of a 9 to 3 score by Pataskala.

Failure to hit the ball in the pinches and poor playing on the part of the Bird outfielders cost the Circleville entry a chance to go into a tie for first place.

The all-around work of Trego, the Bird second-sacker, was the only bright spot of the game. He again played errorless ball accepting five chances, and at bat he gathered three safe blows.

Downs, the starting pitcher, was ineffective and gave way to Boyd in the seventh inning.

Birkhead got the longest hit of the game when he tripled in the seventh inning.

Bowie, the Pataskala manager, was the big noise for the winners. He connected for four in four trips to the plate.

Five-Eyed Insects

All insects, with few exceptions, have five eyes. Two of these are the compound eyes, which are situated on each side of the head. The three remaining eyes are of the ordinary kind and are found on top of the head. These are usually clustered closely together in the form of a triangle. The compound eyes are for normal vision; the three simple eyes being more light sensitive, are able to distinguish between light and darkness. This is very important especially for the night flying insects.

THE RULE IS!

By GEORGE SARGENT
Golf Professional

The Situation:

A ball is played down the fairway, and in slicing off to the edge of the rough accidentally hits a workman or spectator then rolls out on to the fairway, giving the player a good lie. Does the player play the ball from its lie or must he drop it at a point where it hit the person?

The Rule Is:

If any agency outside of a match stops or deflects a ball in motion, the ball shall be played from where it lies.

(One of a series of golf rule illustrations prepared by The Burke Golf Co. in the interests of true sportsmanship and better knowledge of golf rules.)

Lady Daredevils Gather for Air Race

The National Women's Air Derby from Santa Monica, California, to Cleveland, Ohio, has attracted many of the star women fliers in the country. Among those who will start and hope to finish in the cross country hop are (top, left to right) Marvel Crosson, holder of the women's altitude record; Mrs. Florence Lowe Barnes, society aviatrix; (bottom, left to right) Lady Mary Heath, premier woman flier of England, and "Bobbie" Trout, former holder of the woman's endurance record. It will be a fair field with no favors.

TELEPHONE BOOKS TABOO AS SAFES

Directory Collection Creates Flurry in City Homes And Offices

Old telephone directories contain numbers—and a number of other things, it was revealed by the recent collection of old directories and distribution of new ones in Cleveland.

As the telephone books were gathered up, subscribers began to remember articles of value that had been left in them. Money, valuable papers, neckties, mailing lists, important references and scores of other things had been taken away with the old books.

Calls began to rain into The Ohio Bell Telephone Company office, requesting the recovery of lost articles. Sometimes they could be recovered, sometimes not.

The most outstanding instance occurred when a Cleveland woman left \$175 in currency between the pages of her directory. The book was collected, loaded into a truck and hauled with tons of others to a warehouse in the eastern part of the city. Then came a frantic call from the subscriber. The money was finally discovered and restored to the owner, after searchers had poked through four or five tons of books at the warehouse.

Noise May Grow

A great deal of the noise which assaults our ears in a busy city, for instance, is not only due to the constantly increasing use of machinery but because the type of building construction now used tends to prolong and transmit noises. A bare plastered wall, for example, reflects noises better than a mirror reflects light. If you clap your hands together in a bare plastered room, more than 95 per cent of the noise will be reflected from the wall. The sound of the hand clap will, therefore, persist for several seconds. This phenomenon of reverberation causes noises to be built up and retained "alive" in a room in such a way that their intensity is actually increased.

Fifty-Fifty

The well-known Irish comedian, Talbot Fennell, tells the story of a typical "bait" perpetrated by one of his countrymen.

A small touring company was playing to a rather meager audience in a remote Irish town, and the manager, wishing to find out how the attendance at his show compared with the attendance at others, asked one of the local inhabitants how the theater was usually patronized.

"Oh, not so bad, not so bad," was the reply. "Sometimes it's half full and sometimes it's half empty,"—Pearson's Weekly.

PRO GRID TEAMS TO FORM LEAGUE

CHILLICOTHE, Aug. 19.—Representatives of eight Ohio and one Kentucky professional football teams met here Sunday afternoon for the purpose of laying plans to organize a league for the coming season.

The teams represented were Cincinnati National Guards, Cleveland Collegians, Ashland Armco, Middletown Armco, Cleveland Panthers, Ironton Tanks, Canton Bulldogs, South Akron Awnings and Chillicothe Eagles.

Another meeting will be held in two weeks at which time officers will likely be elected.

The Chillicothe club announced at the meeting that Bob Rowan and Byron Eby, former Ohio State stars, would play under the Eagle's colors.

TWO RECREATION CONTESTS TONIGHT

There will be two games played in the Recreation Ball League tonight. At the Utilities park Ward's Ten and the Pettit Tires will battle to see which is the best. At the present time they are in a tie for sixth place.

At Mason's park the C. A. C. and Lutheran Brotherhood will have a battle. As everyone knows the Brotherhood is slowly coming to the front and if the club team don't watch them tonight, they will be defeated.

SENATE ENDS ITS VACATION

Upper House Gathers in Washington To Face Tariff Problems.

WASHINGTON, Aug. 19.—Re-assembling after a ten weeks' vacation from its special farm relief session, the senate today found the new \$700,000,000 tariff bill, completed as to rates, but with debate on it postponed until after Labor day.

Only Vice President Curtis, a handful of party leaders and the regular attaches were present for the brief session. Under a gentleman's agreement, the senate will recess from time to time until September 4 without transacting any but routine business. The recesses will run from Monday to Thursday and Thursday to Monday.

The house meanwhile continued on vacation. It will return Sept. 16 only to face the prospect of another long vacation until after the senate has passed the tariff measure.

The senate finance committee now will begin consideration of administrative features in the tariff act. The highly controversial issue over giving the president power to raise and lower rates and the equally important question of valuations must be determined before the bill is ready for the senate.

With Democrats already opening fire on various sections of the bill, particularly the sugar rates, administration leaders faced a tremendous task to get the measure enacted into law before the special session ends.

Smoking Among Women Alarmed Men in 1868

In 1868 the growing practice of smoking and dipping snuff by refined women in both North and South writes Arthur Train in the Saturday Evening Post, were stigmatized by S. Bayler Brightly in the April number of "The Galaxy" as shockingly on the increase.

In the South particularly, owing to the influence of their negro maids, "young and tenderly nurtured girls, belonging to the richest and proudest families in the neighborhood, smoked to an extent that would be regarded as dangerously excessive even among men, and not cigarettes or cigars or yet elegant little chibouks or nargiles, fashioned to suit their delicate lips but short, black duds from the North, and pipes of native invention made of a red stick into a bowl of red earth or a cornucopia."

MONDAY AUGUST 19.
LIGHT IS INVALUABLE IN PROMOTING HEALTH
Natural "Skynshine," Even Though Not Received Directly from the Sun, Carries the Beneficial Ultra Violet Rays, Famous Authority Points Out.
By ROYAL S. COPELAND, M. D.
United States Senator from New York
Former Commissioner of Health, New York City

SOMEWHERE
I saw this quotation from Southey:
"I marvel not O Sun, that unto thee
In adoration, man should bow the knee.
And pour the prayer of mingled awe and love.
For like a God thou art, and on the way
Of glory shedd'st, with benignant ray,
Beauty and life and joyousness from above."
Nothing that poet, madman or doctor say in praise of sunlight is too extravagant to be true. To the sun we owe everything for our health we enjoy.
You cannot be well, strong, vigorous, and magnetic without absorbing what sunlight can give. There are qualities in light that stimulate the circulation, enrich the blood and to length of days.
I never see a white-livered, putty-colored person without being forced to restrain myself. I just long to read him a lecture about the importance of light.
Not everybody can have sunshine in the home. Many city houses never get a ray. But, fortunately for us, "skynshine" carries the ultra-violet rays. From the sky and the clouds, even though there is no sunshine will come the helpful and health-giving rays.
I fear that the average person fails to appreciate the importance of the sun's rays in the battle of life. Unless the covering of the body is kept clean, is thoroughly aired and exposed to light, its wearer is robbed of one of the chief agencies of health promotion.
When cold weather comes many of us will shiver and complain of the temperature. If the skin is given daily exposure, as it should be, it will grow strong and resistant. It will be less violently affected by extremes of weather.
There is a fad just now for sunbaths. It is the most sensible fad of recent years. It is to be hoped it will not be short-lived.
Take advantage of the Summer and Fall months to accumulate a good coat of tan. Then do not let it fade out as Winter comes. You will be better now and all through the year if your skin is burned.
Answers to Health Queries
Mrs. W. R. S. Q.—How old should a baby be before being permitted to look at moving pictures? Also what month does a baby begin to sit up unaided?
A.—Babies should not be taken to see moving pictures—a child should be at least six years before indulging in this recreation. Depends upon the strength and general health of the baby—some babies sit up about the sixth month but there is no hard and fast rule governing this.
R. A. F. Q.—What causes ringing in the ears? What can be done to stop it?
A.—Ringing in the ears is often due to nasal catarrh which has extended into the middle ear. Special treatment is advisable.
J. Z. Q.—What will make my eyelashes grow?
A.—What do you advise for developing the curl of the eye?

Hot-Weather Advice to Mothers of Babies.
IN HOT weather a baby suffers from prickly heat. A fine rash appears on the skin. Along with it is a lot of itching and burning, making the baby restless and liable to cry.
The most common cause for prickly heat or heat rash is over-dressing the baby in hot weather. If the infant is dressed too warmly there is sure to be sweating. This is followed by the rash, and it will not disappear until the sweating is overcome.
Don't be afraid to expose the child to the air. In very warm weather take off all the clothing. Spread down a sheet on the floor or on the grass. Put the baby on this and let him kick and crawl to his heart's content.
When you expose the little youngster in this way, you will, of course, be careful so as not to expose the child too much to the rays of the sun. But unless it is a very hot day it will do no harm to accustom the child to the rays of the sun. They have a magical effect upon the health and well fare of the infant.

TOWNSHIPS GIVEN GAS TAX FUNDS
COLUMBUS, O., Aug. 19.—Announcement of the distribution of \$401,400 of state gas tax funds to Ohio's 1,338 townships for use in improving highways was made today by State Auditor Joseph Tracy. Each township received \$300.
This was the first distribution to the townships under the new act passed at the last legislative session, increasing the state gas tax one cent and boosting it to three cents from two cents per gallon.
The state auditor's office expects to make another distribution of more than \$500,000 to the townships before the end of this year.

KILLS 4 CHILDREN, WIFE AND HIMSELF
DETROIT, Aug. 19.—(INS.)—Four children and their parents were found dead in their home today, victims of the father who asphyxiated his family with gas and then committed suicide by drinking poison.
The dead are Hans Peter Nielson, his wife, Magdaline, and their four children. The tragedy occurred in the Nielson home at Royal Oak, a nearby town.
A milkman, making his rounds this morning, saw fire through the windows of the Nielson house. The father had sprinkled the bodies of his family with gasoline and ignited them just before he himself drank acid, investigators said.

OHIO TELEPHONES OUTNUMBER THOSE OF 2 CONTINENTS
Wires Hum as Americans Talk 25,200,000,000 Times Each Year
Ohio has more telephones than South America and Africa combined, according to world telephone statistics just issued by the American Telephone and Telegraph Company. In Ohio there are 683,518, while the two continents have 607,167.
Talkative Uncle Sam! The United States leads the world in telephones and telephone conversations by quite a substantial margin. In this country there are 13,522,767 telephones over which Americans talk on an average of 25,200,000,000 times each year. Germany ranks second in the number of telephones with 2,814,396, while Great Britain and Northern Ireland have 1,653,502. Canada ranks fourth with 1,239,987.
Japan ranks second in the number of telephone conversations with an average of 2,536,053,000 carried on over 750,561 telephones. Comparing the United States and Japan in this respect, it would appear that the Japanese far outdo us in regard to telephonic communication considering the facilities available. Japan has only 1.2 telephones per 100 population, while the United States has 15.8 per 100.
Ohio Bell Shows Increase
Figures compiled by The Ohio Bell Telephone Company show an unprecedented growth during the first six months of 1929. From 628,410 telephones in Ohio in 1928, the company has increased to 683,518. Last year the increase during the first six months was 21,567. During the first half of this year the gain was 36,476.
Sixty per cent of the world's telephones are in the United States, 28 per cent in Europe and 12 per cent in all other countries.
There are 105,558,138 miles of telephone wire in the world, enough to wind about the globe 4,222 times with 3,138 miles left over. Approximately 61 per cent of this, or 63,836,182 miles, is in the United States.
San Francisco Leads World
The latest available world telephone data was compiled as of January 1, 1929. Among the cities of the world, San Francisco leads in telephones per 100 population, the average being 32. Stockholm, Sweden, ranks next with 29. Washington, D. C., is a fraction below this number, and Chicago ranks fourth with 28. Eleventh on the list is Cincinnati with 23 telephones per 100 population. The average of telephones per 100 population for the entire globe is 1.6.
Development during the year 1927 was rapid, as is shown by the world increase of 1,583,743 telephones. Of this number, Uncle Sam accounted for 776,599, and the whole of North America for 849,322. South America gained 36,064; Europe, 515,897; Asia, 114,410; Africa, 14,897, and Oceania, including Australia, the Dutch East Indies, Hawaii, New Zealand and the Philippines, 53,143.
At the beginning of 1928 the United States had 15.8 telephones per 100 population, Canada had 13 per 100, and New Zealand ranked third with 10 per 100.

ILL 3 YEARS THEN KONJOLA WON VICTORY

Stomach and Kidneys Disordered—Neuritis Developed; Then Konjola Came To Rescue.

"It is almost beyond belief what Konjola did for me," said Mrs. Eva Ball, 2973 Spring Grove Avenue, Cincinnati. "For three years I suffered from stomach and kidney troubles, and neuritis. I was frantic from worry, for no medicines or treatments gave me more than temporary relief, and then the troubles came back worse than before."

"It was a lucky day for me when I started with Konjola. My improvement was rapid. I gained twelve pounds in a short time. Every trace of my old ailments was driven from my system. I hardly knew what was happening, but now I have my old health again. Konjola accomplished what I thought was impossible. I really can't find words to do justice to this wonderful new medicine!"

Konjola is sold in Circleville, at Hamilton & Ryan's drug store, and by all the best druggists in all towns throughout this entire section.—Adv.

Talkative Uncle Sam! The United States leads the world in telephones and telephone conversations by quite a substantial margin. In this country there are 18,522,767 telephones over which Americans talk on an average of 26,200,000,000 times each year. Germany ranks second in the number of telephones with 2,814,996, while Great Britain and Northern Ireland have 1,633,892. Canada ranks fourth with 1,559,987.

Japan ranks second in the number of telephone conversations with an average of 2,586,053,000 carried on over 750,561 telephones. Comparing the United States and Japan in this respect, it would appear that the Japanese far outdo us in regard to telephonic communication considering the facilities available. Japan has only 1.2 telephones per 100 population, while the United States has 15.8 per 100.

Ohio Bell Shows Increase
Figures compiled by The Ohio Bell Telephone Company show an unprecedented growth during the first six months of 1929. From 623,410 telephones in Ohio in 1928, the company has increased to 688,518. Last year the increase during the first six months was 21,537. During the first half of this year the gain was 36,476.

Sixty per cent of the world's telephones are in the United States, 28 per cent in Europe and 12 per cent in all other countries.

There are 105,558,138 miles of telephone wire in the world, enough to wind about the globe 4,222 times with 8,138 miles left over. Approximately 61 per cent of this, or 63,836,182 miles, is in the United States.

San Francisco Leads World
The latest available world telephone data was compiled as of January 1, 1928. Among the cities of the world, San Francisco leads in telephones per 100 population, the average being 32. Stockholm, Sweden, ranks next with 29. Washington, D. C., is a fraction below this number, and Chicago ranks fourth with 28. Eleventh on the list is Cincinnati with 23 telephones per 100 population. The average of telephones per 100 population for the entire globe is 1.6.

Development during the year 1927 was rapid, as is shown by the world increase of 1,583,743 telephones. Of this number, Uncle Sam accounted for 776,599, and the whole of North America for 849,322. South America gained 36,064; Europe, 515,597; Asia, 114,410; Africa, 14,897, and Oceania, including Australia, the Dutch East Indies, Hawaii, New Zealand and the Philippines, 53,143.

At the beginning of 1928 the United States had 15.8 telephones per 100 population, Canada had 13 per 100, and New Zealand ranked third with 10 per 100.

EAGLES' NINE GIVEN DEFEAT BY PATASKALA

Locals Fail To Hit In Pinches and Play Poorly Sunday At Ashville.

The Circleville Eagles continued their losing streak Sunday in the game at Ashville when they were dropped on the short end of a 9 to 3 score by Pataskala.

Failure to hit the ball in the pinches and poor playing on the part of the Bird outfielders cost the Circleville entry a chance to go into a tie for first place.

The all-around work of Trego, the E.D. second-sacker, was the only bright spot of the game. He again played errorless ball accepting five chances, and at bat he gathered three safe blows.

Downs, the starting pitcher, was ineffective and gave way to Boyd in the seventh inning.

Birkhead got the longest hit of the game when he tripled in the seventh inning.

Bowie, the Pataskala manager, was the big noise for the winners. He connected for four in four trips to the plate.

Five-Eyed Insects
All insects, with few exceptions, have five eyes. Two of these are the compound eyes, which are situated on each side of the head. The three remaining eyes are of the ordinary kind and are found on top of the head. These are usually clustered closely together in the form of a triangle. The compound eyes are for normal vision; the three-simple eyes being more light sensitive; are able to distinguish between light and darkness. This is very important especially for the night flying insects.

Golf Professional

The Situation:
A ball is played down the fairway, and in sliding off to the edge of the rough accidentally hits a workman or spectator then rolls on to the fairway giving the player a good lie. Does the player put the ball from its lie or must he drop it at a point where it hit the person?

The Rule Is:
If any agency outside of a match stops or deflects a ball in motion, the ball shall be played from where it lies.

TELEPHONE BOOKS TABOO AS SAFES

Directory Collection Creates Flurry in City Homes and Offices

Old telephone directories contain numbers—and a number of other things, it was revealed by the recent collection of old directories and distribution of new ones in Cleveland.

As the telephone books were gathered up, subscribers began to remember articles of value that had been left in them. Money, valuable papers, neckties, mailing lists, important references and scores of other things had been taken away with the old books.

Calls began to rain into The Ohio Bell Telephone Company ofice, requesting the recovery of lost articles. Sometimes they could be recovered, sometimes not.

The most outstanding instance occurred when a Cleveland woman left \$175 in currency between the pages of her directory. The book was collected, loaded into a truck and hauled with tons of others to a warehouse in the eastern part of the city. Then came a frantic call from the subscriber. The money was finally discovered and restored to the owner, after searchers had poked through four or five tons of books at the warehouse.

Noise May Grow

A great deal of the noise which assaults our ears in a busy city, for instance, is not only due to the constantly increasing use of machinery but because the type of building construction now used tends to render and transmit noise. A house clustered with, for example, tenements, is better than a single detached house. If ten or four houses are together in a line, the sound of the police will be reflected from the walls. The sound of the hand saw will, therefore, persist for several minutes. This phenomenon of sound reflection causes noise to be built up and retained "bottle" in a room in such a way that their intensity is actually increased.

How Poppy Became Symbol

There is some confusion and misunderstanding in regard to the use of the poppy as a symbol by the American Legion and the Veterans of Foreign Wars. The poppy was first sold in this country for war relief before the armistice, when Mrs. Guerin disposed of millions of them which had been made by French orphans. The Veterans of Foreign Wars bought the last of her stock. In 1920 the American Legion had a national poppy sale, but in 1921 had a daisy sale. The Veterans of Foreign Wars then had a poppy drive. Later the Legion used the poppy. Both organizations now sell poppies near Memorial day for needy veterans, and it seems that this flower has found a place in the American heart along with the red cross upon a white field.

SENATE ENDS ITS VACATION

Upper House Gathers in Washington To Face Tariff Problems.

WASHINGTON, Aug. 19.—Re-assembling after a ten weeks' vacation from its special farm relief session, the senate today found the new \$700,000,000 tariff bill, completed as to rates, but with debate on it postponed until after Labor day.

Only Vice President Curtis, a handful of party leaders and the regular attaches were present for the brief session. Under a gentleman's agreement, the senate will recess from time to time until September 4 without transacting any but routine business. The recesses will run from Monday to Thursday and Thursday to Monday.

The house meanwhile continued on vacation. It will return Sept. 16 only to face the prospect of another long vacation until after the senate has passed the tariff measure.

The senate finance committee now will begin consideration of administrative features in the tariff act. The highly controversial issue over giving the president power to raise and lower rates and the equally important question of valuations must be determined before the bill is ready for the senate.

With Democrats already opening fire on various sections of the bill, particularly the sugar rates, administration leaders faced a tremendous task to get the measure enacted into law before the special session ends.

Smoking Among Women Arose Men in 1868

In 1868 the growing practice of smoking and dipping snuff by refined women in both North and South won Arthur Train in the Saturday Evening Post, were stigmatized by Schuyler Brightley in the April number of "The Galaxy" as shockingly on the increase.

In the South particularly, owing to the influence of their negro maids, "young and tenderly nurtured girls, becoming to the richest and proudest families in the neighborhood, smoked to an extent that would be regarded as dangerously excessive even among men, and not cigarettes or cigars or yet elegant little chibouks or nargiles, fashioned to suit their delicate lips, but short, black dunces from the North, and pipes of native invention made of a red stick into a bowl of red earth or a cornucopia."

Strouse and son, Pearl, Mr. and Mrs. George W. Strous and son, Noah, Mr. and Mrs. Russell Jones and children, Nelson and Jennie Louise, all of, and near Tarlton.

As part of the program of the day the history of the family was read. This history has but recently been compiled and contains some most interesting facts about this family. The genealogy has been traced to 1172, where the family originated in Pomerania, a kingdom in Prussia. The first ancestors to come to America were in 1752. The family came from Pennsylvania after making a number of illustrious names for themselves in that state, and settled in Pickaway and Fairfield counties about 1816.

The history proves most interesting but is too long to recount here.

The Twenty-ninth annual reunion will be held at the same place on the third Sunday of August, 1930. The same retinue of officers were re-elected for the ensuing year. Mrs. W. A. Bowers of Ashville, Pres., J. D. Hummel of Circleville, Vice-pres., E. F. Strouse, of Laurelville, Sec'y-treas. and C. A. Swoyer of Columbus, historian.

SCHOOL PUPILS HAVE REUNION

Mrs. J. P. Bennett attended the Pleasant-Grove school reunion Sunday at the Pleasant Grove school house near Williamsport. Although the various family reunions made the group here small, the pleasures of old friends meeting together was a most delightful occasion.

Many who had attended the school, had been pupils when Mrs. Bennett taught there. A number of these were present at the reunion, as well as those who had attended there at a different time. The Hon. C. C. Chappale of W. High-st is also a former teacher of Pleasant Grove school, but he was unable to attend the reunion.

THEY SPEAK YOUR LANGUAGE

THERE was a time when you had to take an interpreter into the store with you when you went shopping, a few hundred miles from home. The things they had for sale were hard to recognize. Even familiar products were sold in strange forms, and under queer names.

It was one of the disadvantages of travel that had to be taken along with the pleasures.

Nowadays the millions of Americans who go visiting their neighbors North, South, East and West, encounter no such difficulty. The picturesque beauty, the quaint customs that make other sections of the country different and delightful have all their old appeal. You can still hear mellow mission bells in California. You can eat terapin in Baltimore, or sleep in a Vermont farm-house under an Ethan Allen quilt. But in any of these localities you can buy your favorite toilet soap, or breakfast cereal, or automobile tires as readily as in your own town.

The trade-marks and the packages speak your language. National advertising has made good brands of merchandise uniformly known from coast to coast.

If you read the advertisements and use advertised goods, you are at home in any store in America.

Fully half of the many people who have already joined the 8th Annual Heatrola Free Coal Club tell us they have been urged to do so by friends who now own Estate Heatrolas—who know the joy and comfort of Heatrola warmth—who know what it means to get Free Coal!

Two dollars makes you a member, and this payment is applied on the purchase price of any model Heatrola which you may select. Early this Fall we will install the Heatrola in your home, and the coal man will deliver a ton of Free Coal (one-half ton with the Heatrola Junior). After that you may pay the balance on convenient installments.

The offer ends August 31st. Come in, or call us and we'll come to see you.
